Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claim1-13 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim1, 4-5, 8, 11-13 is rejected under 35 U.S.C. 102(e) as being anticipated by Nakamura (Pub No US 2003/0142604).

Regarding claim1,11,13, Nakamura anticipates Method for determining the format of an optical recording medium comprising one or more sessions, each session comprising a table of contents and one or more tracks, the method comprising the steps of: reading the table of contents of a first session of the recording medium (see figure9 ST21) ; checking whether more than one track is present in the first session and/or whether at least one track is indicated as being an audio track in the table of contents(see figure9 ST31) ; and determining the format of the recording medium to be

audio if at least one of the checking steps yields a positive result (see figure9 ST25), and determining the format to be data else (see figure9 ST26).

Regarding claim4, Nakamura anticipates method according to claim 1, wherein the checking steps are based on data in the table of contents, which must not be altered to ensure compatibility with standard audio format players (see paragraph 008 and figure9 ST31).

Regarding claim5, Nakamura anticipates method according to claim 4, wherein the data in the table of contents used for the checking steps comprises address data and pointer data (see paragraph 0072).

Regarding claim8, Nakamura anticipates method according to claim 1, further comprising the step of suppressing sessions other than the first session in case the format of the recording medium is determined to be audio (see figure9 ST25).

Regarding claim12, Nakamura anticipates Disc format determination module according to claim11, wherein it is interposed in the communication between an optical leading unit and a servo controller module (see figure4, 6 and 8).

Allowable Subject Matter

Claim2-3, 6-7 and 9-10 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
